About Us

Constantly striving for excellence

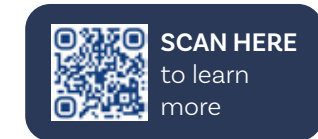

Established in a garage in 1979, T&K Home Improvements has grown to become one of the most reputable independent manufacturers and installers of windows, doors and extensions in Northamptonshire.

We are proud of our reputation for delivering outstanding customer service, a reputation founded on more than 70,000 satisfied customers, and over four decades of quality craftsmanship.

Not content to rest on our laurels, we continue to strive for excellence, embracing advances in technology that help us improve the energy- efficiency, security and aesthetics of our products, all of which come expertly fitted and fully guaranteed for 10 years.

We are pleased to offer a range of flexible payment plans to help fund your ideal home improvements.

We look forward to sharing our knowledge and expertise with you.

Our Story

1979
Tony Foster and Kevin Johnson starts T&K, from their garage.

1984
T&K rents units in Wellingborough and Burton Latimer before purchasing a factory in Finedon. In 2001, T&K moves to current location.

1991-1992
T&K is one of a handful of companies to be awarded the first BSI kitemark for windows.

2006
T&K acquires Acorn Aluminium.

2011
Ecostar Double Glazing starts trading in Melbourne, led by Craig Johnson.

2018
T&K acquires Padiham Glass.

2018
T&K invests £2.2 million in a factory expansion to 57,000sq ft – equivalent to three football pitches. In addition £1.4 million is invested in state of the art machinery.

2021
T&K wins best Fabricator award.

2022
T&K invests over £1 million in a Forel Spa IGU production line to ensure stable glass quality.

2023
T&K invests in another 25,000 square foot factory unit specialising in door manufacture.

2023
T&K launch exclusive UK £10,000 Security Guarantee.

2024
T&K attains Investors In People accreditation at the first attempt.

2024
In 2024 T&K were shortlisted at the finals of the G Awards for Fabricator of the Year.

2024
Winner of Best Business Initiative. T&K partnered with eva crm to develop this award-winning Customer Relationship Management system.

2025
T&K is named Fabricator of the Year at the G-Awards 2025.

2025
T&K wins the Big Business of the Year award at the 2025 Northamptonshire Business Excellence Awards.

Local Company, Nationally Recognised

**Fabricator
of the Year**

T&K is named Fabricator of the Year at the G-Awards 2025 – the third time in a decade. Judges recognised T&K’s commitment to innovation, sustainability and continuing investment.

**Big Business
of the Year**

T&K wins the Big Business of the Year award at the 2025 Northamptonshire Business Excellence Awards for its continued growth, expansion and commitment to customer service.

**Fabricator
of the Year**

In 2024 T&K were shortlisted in the finals of the G-Awards for Fabricator of the Year.

**Best Business Initiative
of the Year**

T&K partnered with EVA CRM to develop this award-winning CRM system.

**New Product
of the Year**

T&K’s partnership with Kubu and their ‘Floating Window Sensor’ and ‘Kubu Smart’ developments impressed the judges at the G-Awards in 2023 making T&K the winner of New Product of the Year.

**Fabricator
of the Year**

In 2023 T&K were finalists at the Glass and Glazing Industry Awards for Fabricator of the Year. The G-Awards are a celebration of achievement and innovation in the UK window and door industry.

**Fabricator
of the Year**

In 2022 T&K were finalists at the Glass & Glazing Industry Awards for Fabricator of the Year.

**Fabricator
of the Year**

In 2021, T&K were named Best Fabricator at the Glass & Glazing Awards, bringing this title home for the second time in 6 years.

**Installer
of the Year**

In 2020, T&K won the Installer of The Year Award, which is regarded as the greatest home improvement accolade of them all.

**Retail Business
of the Year**

In 2019 T&K were crowned Retail Business of the Year at the Wellingborough Chamber of Commerce Business Awards.

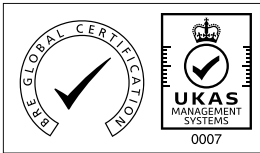

Local Company, Nationally Accredited

To ensure you keep safe and secure in your home, T&K's home improvements and installation services come fully accredited from the following associations:

ISO 9001 is the internationally recognised standard for Quality Management. It was created to give organisations the tools to reduce costs and improve productivity. ISO 9001 certification also provides you with assurance that you will receive consistent, quality products and services. ISO 9001 contains a set of Quality Principles, which include, but are not limited to customer focus, continual improvement and relationship management.

ISO 14001 is an internationally agreed and recognised standard for Environmental Management Systems. An EMS supports organisations in identifying, managing, monitoring and controlling environmental processes. The standard requires organisations to regularly assess environmental issues relevant to their operations, such as waste management, resource use, energy use and efficiencies.

PAS24 accreditation is the BRE kitemark for enhanced security performance of doorsets and windows.

Secured by Design (SBD) is the official police security initiative. Their aim is to reduce crime and help people live safely. They seek to improve the physical security of buildings using products, such as doors, windows, locks and walling systems that meet SBD security requirements. SBD's product based accreditation scheme provides a recognised standard for all security products that can deter and reduce crime, only products which have withstood a 6 minute attack test gain this accreditation.

The British Fenestration Rating Council (BFRC) is the UK's most trusted rating council for verifying the energy performance of windows and doors. The BFRC rainbow rating confirms products have been independently verified by experts and have been assessed to ensure the whole system will perform as promised. This gives homeowners the evidence they need to make the right choice for insulating their home.

Made in Britain brings together the best of the British manufacturing community, united by the use of the registered collective mark. Only businesses that comply with MiB's stringent terms and conditions and who manufacture in the UK can use the kite mark. Rigid verification of companies and testing has to be completed to become a member. We are the only Manufacturer in the Midlands to hold the accreditation.

As a DGCOS Member we have to pass a strict accreditation process for our products, and are continually monitored to make sure that we are compliant. Their checks include financial capability, individual competency certificates and business insurance. If you were to become a customer of T&K you would receive free access via the DGCOS which covers Deposit and Stage Payment Protection, Guarantee Protection and independent consumer advice.

T&K are an Assure-certified installer which means you can rest assured that your installation complies with building regulations and meets all legal requirements. You will be sent a certificate within 28 days of final payment which proves that the work is registered with the local authority. All of our installers and surveyors are registered with Assure, illustrating that they have the appropriate Mandatory Technical Competences (MTC's) to complete the work on your home.

IIP accreditations aren't given out lightly. Our recognition for this goes back to June 2023 and involved company-wide assessments: surveys, leadership presentations, employee interviews, and more. It's all part of our commitment to providing the very best installation, which is only possible by being the best employers for the best people.

We are extremely proud of being a part of the Ultraframe Ultra Installer Scheme. To ensure high standards are maintained, all Ultra Installers undergo an initial assessment and follow-up assessments throughout their membership. This ensures that we provide a high standard of service to our customers.

Sustainability

T&K are committed to sustainability in the way we work and are striving towards an ethical, environmentally-friendly future for everyone.

More than 99% of the general waste around our factories and offices is recycled. In 2024, we set ourselves the target of reducing our cardboard packaging and plastic usage by a further 30% which we exceeded.

RESPONDING TO THE NEED TO SAVE PRECIOUS ENERGY

Our passion for sustainable energy is proudly on display with more than 1460 solar panels installed on our factory roof.

While we’ve led the way on this over the past 10 years and sourced renewable energy wherever possible, we’re aware that eco-friendly practices are increasingly important for businesses and homeowners alike.

Various economic factors compounded by worldwide conflict have seen energy prices for UK householders rise by at least 50%.

With the average energy bill spiralling out of control, we are all looking for ways to save more. Around 40% of CO2 emissions come from residential homes, so anything we can do to reduce this is going to be helpful.

Whether you’re looking for a greener lifestyle due to financial or ethical reasons, it’s important to understand how investing in new windows and doors can help you save money and help the planet. Everybody wins!

DOUBLE GLAZING: THE UNSUNG HERO

T&K is committed to the promotion of energy efficient products in homes across the Midlands. Double glazing has been described as the unsung hero in the fight against climate change at the World Economic Forum.

SHARING OUR PASSION FOR SUSTAINABILITY

We work alongside companies that share our environmental concerns.

For example, our partners have helped devise efficient recycling programmes: Once our PVC-U profiles reach the end of their usable lives, they can be shredded and the materials compressed into pellets. These can then be extruded into PVC-U and reused.

This process can be repeated up to 10 times, meaning the materials in a single window or door frame could see up to 400 years of practical use.

The process has been designed to be as eco-friendly as possible, using low-emission vehicles and the shortest routes to reduce drive times.

UNRELENTING FOCUS

While we are proud of our efforts to date, and those of our partners, suppliers and customers, there is still so much more to be done to improve sustainability.

If you would like more information about our greener ways of working or about all aspects of your home improvement plans, we would love to hear from you.

Energy Efficiency

We have all seen what a volatile energy market can do to our gas and electricity bills.

Windows and doors account for up to 45% of the total energy lost from your home. It makes sense to look for replacement options that will not only save you money but reduce carbon emissions and the impact on the environment in the process.

Our energy efficient windows and doors are the most advanced products in the market today, designed and manufactured to the highest quality standards, exceeding all current UK regulations for window and door energy-efficiency.

THE POWER OF ENERGY-EFFICIENCY

- Reduced heat loss
- Lower energy bills
- U value = 1.3 (Double) 0.9 (Triple)
- Quieter living space
- Greater all-round comfort
- Increase house value up to 15%*

Energy Efficiency

For energy-efficiency, heat retention or noise reduction it's the glass in your window that also makes a big difference.

The Living Glass Range features three different specifications each offering superb comfort and energy efficiency. More advanced specifications can be selected either for a full installation or tailored to a specific window or door in your home.

EVERYDAY LIVING	ADVANCED LIVING	ULTIMATE LIVING
EVERYDAY WARMTH, COMFORT AND ENERGY EFFICIENCY A Low-E (low emissivity) energy-efficient glass type to suit every type of property, from a modern home to an older traditional style of home. The inner pane of the energy-efficient double-glazed unit reflects heat back into the room whilst also letting in free heat from the sun.	ADVANCED SPECIFICATION FOR ENHANCED SECURITY, NOISE CONTROL AND SOLAR PROTECTION Offering the energy efficiency performance of the Everyday Living Range, the Advanced Living specification also offers excellent noise and solar control without compromising on natural light transmission.	DELIVERING ENERGY EFFICIENCY, SECURITY, NOISE CONTROL AND ENHANCED SOLAR PROTECTION Our Ultimate range offers best-in-class thermal insulation, impact-resistance, security and noise control, as well as our ultimate solar control specification to reduce overheating.

FEATURE		EVERYDAY LIVING	ADVANCED LIVING	ULTIMATE LIVING
	Energy Efficiency	✓	✓	✓
	Additional Security		✓	✓
	Noise Control		✓	✓
	Fade Resistance		✓	✓
	Overheat Reduction			✓

Energy Efficiency

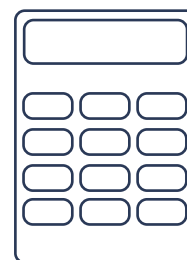

Window and door energy ratings (WERs and DERs) are a clear way of determining their efficiency. They identify how good the products are for:

- Keeping out draughts
- Adding warmth through solar-gain
- Preventing heat loss

Our products are made in our state of the art manufacturing facility and carry the energy rating labels of the British Fenestration Rating Council (BFRC). The BFRC label uses a scale of A++, which is the highest total energy-efficiency rating, to E, which is the lowest. We are proud to say all our PVC-U windows achieve a BFRC energy rating of at least 'A'.

Another method for measuring the thermal performance of a window is to look at its U-value. A U-value is a unit of measurement, in $W/m^2.K$ (Watts per metre square kelvin), used to measure the transference of heat through a structure. It's used to determine how quickly heat can escape through a material. The lower the U-value of a material, the slower the heat will transmit through the material, meaning the material has high thermal insulation properties.

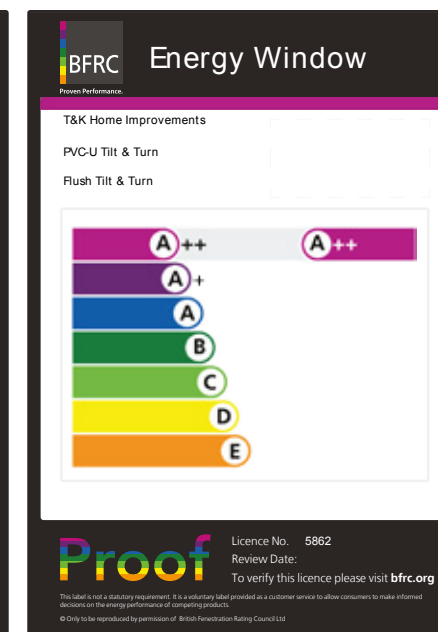

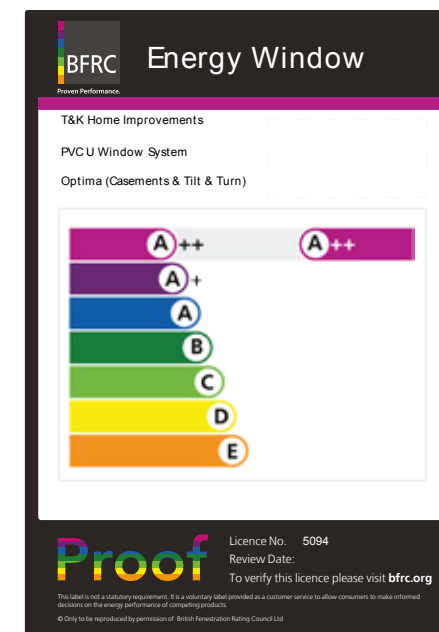

Suffice to say our windows and doors have an extremely low U-value of 0.9 on triple glazed units.

We are proud that all our products achieve a BFRC energy rating of at least 'A'.

Energy Efficiency

Glass is an important factor in defining the energy performance of your new windows and doors.

The expert way it is engineered into the frame ensures the glass performs exactly as it should: keeping your home warm in the winter and cool when it's hot outside. All the double and triple-glazed glass units we supply use smart low-emissivity (low-e) coatings to trap and hold energy.

We use warm-edge spacer bars, which separate the sheets of glass in double and triple-glazed units to put distance between the cold air outside and warm air inside.

This cavity is filled with argon, a gas denser than air which creates a highly effective insulating barrier, helping to keep your home cosy.

Our window frames feature six internal chambers in the sash and six in the outer frame. This thermally efficient 'honeycomb' creates a series of barriers to conserve heat, making them the most efficient product range available.

Police Approved Security

There are over 245,280 burglaries every year within the UK. 1 in 3 of these break-ins are through old and unsecured windows and doors.

Your windows and doors are the first line of defence against any unwanted intruders. By choosing our tough and expertly designed products, you can sleep easier at night knowing your family and belongings are safe and secure, thanks to the exceptional level of security built into our Secured by Design products.

Secured by Design (SBD) is the official police security initiative that works to improve the security of buildings and their immediate surroundings to provide safe places to live. All of our windows and door “Secured by Design” accredited products have been attack tested to achieve the accreditation, providing you with complete peace of mind. Our multi-point locking systems have been tested for over 50,000 cycles and come with a comprehensive 10-year guarantee covering the product and fitting.

PASSING THE PAS 24 TEST

Product Assessment Specification 24, is another security standard for windows and doors security A PAS 24 certification can only be achieved through a rigorous on-going assessment process for manufacturers to ensure glazing systems are always tested to the highest standards. With PAS 24 there is an additional standard of testing to measure the physical security performance of the products to ensure they can resist a level of attack from an opportunist burglar.

CYBER SECURITY KUDOS TO KUBU

Kubu™ is the first product of its kind to secure IASME Level 2 IoT Accreditation (the highest level possible), which perfectly complements the SBD and PAS 24 accreditations already obtained for our works with Kubu™ windows and doors.

Smart Security

Our windows and doors are manufactured to incorporate the Kubu™ Smart Sensor, an innovative piece of technology that lets you know if you have unwittingly left yourself vulnerable to a break-in.

T&K have been at the forefront of high security windows and doors and have recently developed an exclusive smart security system which can alert you if your windows and doors are unlocked, opened or unsecure. The system can be used as a home security alarm, informing you in real-time whether someone is trying to gain entry to your property.

It links to Alexa so you can create an action such as turning on the lights, for example, when the door is opened.

In 2023, our system became the first lock to achieve the hat-trick of formal security ratings: Secured by Design, PAS 24 and, the IASME IoT Cyber Security Accreditation with our Smart Security Sensor.

SMART ALERTS FROM KUBU™

- Instant status updates
- SureSecure™ Geofence alerts
- Scheduled notifications
- Family sharing
- SmartAir/weather/pollen alerts
- Under-attack alerts

“Installing green tech in your home could boost property value by 15%”
Daily Mail Online, 2024.

Window Collection

Window Styles

CLASSIC CASEMENT

Our most popular window style. They're versatile, open outward and can be hung either from the bottom or side. Timeless and with classic appeal, our range of beautiful and flexible casement windows can be designed to complement period properties or contemporary homes, delivering perfectly balanced sightlines.

FLUSH CASEMENT

Flush casement windows are a contemporary British design which combines the technically advanced multi-chamber PVC-U system with traditional timber sightlines. Flush sash windows close neatly into the outer frame, giving a clean and sophisticated look.

FRENCH CASEMENT

Our French casements are designed so they don't require a central mullion (upright), which means you get uninterrupted views once opened.

TILT & TURN

Tilt & turn windows are the ideal solution where your windows are in a position where they are difficult to clean. They can be opened in two ways; tilted inwards for ventilation or turned inwards for cleaning.

SPECIAL SHAPES

Unlock your home's unique character with our bespoke, special shaped uPVC windows, made to your specifications.

Frame Options

Every home is different, which is why we offer a wide range of window styles and colour options.

SCAN HERE
to download
brochures

Making the right choice is about working out not only the best fit to the character of your property but also thinking about how you want to live in it. Choosing a window style is the starting point. Our high energy efficient PVC-U window ranges look as good as they perform.

Each is distinguished by slim and elegant sightliness, a level of detail and a quality of finish that is sure to enhance the character of your home. There's every likelihood it will enhance its value too.

SCULPTURED

CHAMFERED

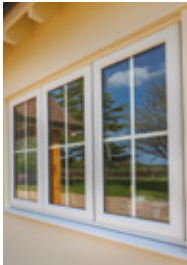

FLUSH

ASTRAGAL BARS

Astragal bars are fixed onto the external and internal surface of double and triple-glazed units giving the effect of a traditional window style.

GEORGIAN BARS

A Georgian bar is inserted internally between the glass panels providing a more authentic look. Due to their position within the glass, they are easier to clean and still retain a traditional look.

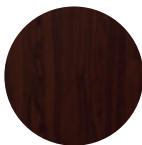

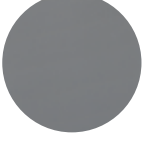

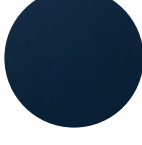

LEADED DESIGNS

Available as rectangular, square or diamond shaped designs, the lead is applied to both sides of the glass.

Colour & Woodgrain Finish

We offer the most comprehensive colour range available in the industry.

					
LIGHT OAK	ROSEWOOD	ANTHRACITE GREY SMOOTH	ANTHRACITE GREY	BLACK BROWN	BLACK ULTI-MATT
					
WHITE	CREAM	PEBBLE GREY	AGATE GREY	SLATE GREY	SILVER D SMOOTH
					
CLAYSTONE	SLATE GREY FINESSE	WINDSOR	SAGE SMOOTH	FLEMISH GOLD SMOOTH	HAZY GREY FINESSE
					
IRISH OAK	HONEY OAK SUPER-MATT	PYRITE	ANTEAK	SWAMP OAK	KENSINGTON GREY
					
DARK RED	STEEL BLUE	DARK GREEN	CHARTWELL GREEN	BASALT GREY SMOOTH	BUCKINGHAM GREY

N.B.: Other colours are available on request.

Door Collection

Safe and Sound

Your front door is the first point of contact. With the reassuring ‘clunk and click’ as it closes behind you, relax and unwind as you shut out the world.

Our range of high security, low maintenance and energy efficient, traditional and contemporary composite front and back doors have been specially selected to give you a choice of design and style to perfectly complement your property. You can’t choose a better composite door.

PEACE OF MIND BUILT IN

There are over 245,280 burglaries every year within the UK. Your front or back door is at the ‘frontline’ in the battle to protect your home from intruders.

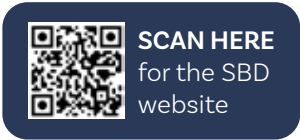

All of our doors can be supplied to the Secured by Design Police Preferred Specification.

This means that our doors not only meet the requirements for door security set out in PAS 24:2016 and Part Q of Building Regulations but have been independently tested as doing so, as defined by the police approved Secured by Design scheme.

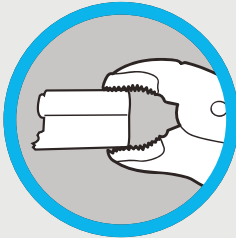

SETTING THE STANDARD FOR DOOR SECURITY

Our doors have been independently tested against the following type of assault:

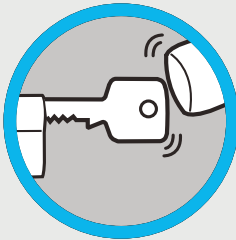

- Manual attack on the locking hardware with tools including screwdrivers, chisels and mole grips
- Three minute attacks on the door cylinder using a range of tools including craft knives and screwdrivers
- Three minute manual attacks using chisels and brick bolsters
- Hard-body impact testing of the leaf, hinge and locking points using a 50kg steel impactor.

FEATURES & BENEFITS

- **PIR FOAM**
Providing excellent thermal capabilities, far exceeding XPS foam as commonly used.
- **HDF sheets**
This high-density product exceeds that of plywood providing brilliant rigidity and strength throughout.
- **Aluminium sheet**
This is a vital layer within the door construction, it adds stability to the door but also protects against moisture infiltration.
- **Exterior grade plywood**
Additional sheet for door support under the GRP skin.
- **GRP skin**
The GRP skins are pressed onto the core with a unique method to ensure flawless correlation with the core.

Bi-folding Doors

T&K Bi-folding doors open your home to the outdoors offering a flexible and unique living space. They increase the natural light in to your home, and can add property value by creating extra space and a modern aesthetic look.

Sliding Patio Doors

Our easy to operate and maintain sliding doors add light and sophistication to any home, extension or conservatory.

You can choose from two, three or four panes of toughened glass that is A-rated for energy-efficiency. All our sliding doors feature a stainless steel easy-glide track system so they open and close with minimum effort. As ever, security is uppermost in our thoughts, so the handle and locking have opposing hooks that prevent the leaf from being lifted from its frame.

French doors have two or more panels of glass, creating a seamless connection between the indoors and outdoors. French doors let natural light flood in, brightening up any room.

Living Spaces

Tried & Trusted Process

Making your dream extension a reality

At T&K, we make creating your dream extension simple and stress-free in 4 easy steps. We handle everything from initial design (no expensive architects required) through to planning permissions, building regulations and the full construction including glazing, building works and foundations. With over 45 years of experience, we tailor bespoke designs to meet your individual needs to ensure a clean and hassle-free installation.

1. EXPERTLY DESIGNED AROUND YOU

Our expert Design Consultants are available to offer free no obligation designs. We offer personalised consultations working closely with you to match your vision and create a space to meet the functionality you need. Whether it's a family area, dining room, kitchen extension – we have a vast amount of designs and options to suit and ensure an all-year-round room.

Our design service includes:

- 3D Visualisations: our detailed renderings bring your design to life before construction begins.
- Quality Materials: Choose from durable, energy-efficient options tailored to your needs.
- Seamless Integration: Designs blend effortlessly with your home's architecture for a cohesive look.
- Meeting your needs: - Every detail is planned for functionality, lasting value and are completely bespoke, meaning you can add the detail you need.

2. TECHNICAL SURVEY, PLANNING AND BUILDING REGULATIONS

T&K offer a full turn-key service, including a full technical survey as well as planning permissions, building regulations and structural calculations where required. We manage every detail of the build for you under one roof. This ensures your project is delivered hassle-free, and you don't have to manage a variety of trades and permissions.

Expert Compliance: We handle all permissions required, tailoring solutions to your project's size, location, and design.

Site Evaluation: A thorough assessment identifies any build issues to overcome, avoiding delays and extra costs.

Streamlined Applications: Our team prepares and submits all documents, addressing concerns swiftly and keeping you updated throughout.

Let us handle the bureaucracy, so you can focus on envisioning your perfect extension.

3. CONSTRUCTION – BUILT TO LAST

Our skilled team with over 47 years of trading, ensures your extension is crafted with care and precision:

Expert Oversight: A dedicated co-ordinator manages timelines, budgets, and progress updates.

Top-Tier Craftsmanship: Every detail, from foundations to finishes, is handled with precision in house.

Quality Checks: Rigorous inspections ensure everything meets the highest standards.

Sustainable Practices: We use eco-friendly methods and materials for a greener more sustainable build.

All year round: Our advanced glazing technologies mean you can bring light and space to your property, and still utilise the space all-year-round, never too cold, or too hot.

Ongoing Support: Comprehensive aftercare and industry leading guarantees keep your conservatory in top condition for many years to come.

4. ENJOY THE ADDED LIVING SPACE

Once complete it is now time to sit back and enjoy your new living space. Imagine sipping your morning coffee in a sun-drenched extension, surrounded by the beauty of your garden no matter the season. At T&K, we create bespoke extensions designed to bring joy to your everyday life, whether it's a peaceful retreat, a vibrant space for entertaining, or a bright playroom for the family.

With natural light flooding in and seamless indoor-outdoor living, your glass extension becomes the heart of your home, a space to relax, unwind, and make lasting memories. It's a true investment, adding up to 15% to your homes re-sale value.

Glass Extensions

The sky is the limit when exploring our wide range of bespoke glazed extensions. Our glass extensions are designed and manufactured with the highest-quality materials and latest glass technologies to keep you and your family comfortable and secure all year round.

T&K extensions are the perfect way to extend your home. Providing an elegant focal point for get-togethers or a warm and welcoming place in which to relax and unwind after a busy day. Choose from a glass to ground extension for a modern look, add bifolding, sliding doors, brick walls and pillars for a more traditional feel. With completely bespoke options designed around you, we can design, survey and build your dream extension as well as take care of all Planning and Building Regulations.

The Hybrid Roof

Our hybrid design combines the best of both worlds. Extend your living space and create a comfortable room that's light, bright and suitable for year-round living.

Whether you are planning a new house extension or replacing an existing conservatory, our hybrid design offers the flexibility you need to enjoy the sense of privacy and comfort that comes with a solid roof but without compromising on light.

The hybrid design is robust, modern and stylish. They are constructed from aluminium or insulated composite external panels forming an all-important wow factor to your home. The roof can be made to almost any design.

Internally, the hybrid roof is stunning, finished with a magnificent, vaulted ceiling incorporating an internal pelmet around the perimeter, where lights or speakers can be easily installed. You also have the option of inserting lights in the ridge, the choice is yours.

Tiled Roof Extensions

Tiled roof extensions provide incredible thermal performance, traditional style and are strong and robust to stand the test of time.

Our tiled roofs are fully tested and compliant with all building regulations and fire safety standards. They are the most thermally efficient conservatory tiled roofs with market leading U-values to keep you warm in the winter and cool in the summer.

A T&K tiled roof is precision engineered and manufactured to your exact specifications. You can incorporate wide expansive doors, full height brick walls, pillars, or more glass to create more space and light.

With a full turn key service from free design consultation, a show site and factory tour, technical survey, planning and building regulations and then the final build. We take the stress out of extending your home by dealing with every aspect from start to finish.

Orangeries

A bespoke orangerie is a beautiful addition to any home, and with a T&K orangerie there is a wide range of traditional and modern design options to help you create your perfect room.

T&K's roof system puts warmth and light at the heart of your new orangerie. Natural light is maximised thanks to slimline components and fewer bars to let in more light than a traditional orangerie or flat roof extension.

On the inside, the lantern shaped roof combined with an internal pelmet creates a cost effective illusion of a traditional orangerie build. This insulating pelmet provides energy efficiency and is the ideal spot for speakers and spotlights.

Choose from a wide range of decorative cornices on the outside to hide gutters and create an elegant roofline. Super-insulated cornices bring strength and solidity to your design and are available in a brick or render finish. Combine these elegant pillars with full height glazing and large door sets to create a contemporary orangerie.

All roofs are designed for the extremes of the UK climate and are engineered to your specific postcode. Our specialist software uses accurate data from NASA to calculate the altitude of your home along with predicted snow loads and wind speed.

UltraInstaller
Product & Service Excellence

Replacement Roofs

Turn your conservatory into an all-year-round extension.

Explore our wide range of replacement conservatory roof options to transform your existing conservatory into an all-year-round living space. By choosing to upgrade your current conservatory with T&K you'll bring your existing conservatory up-to date with the most energy efficient and reflective glass technologies, adding value to your home and saving money on expensive energy bills for years to come.

If you want a tiled replacement roof, our T&K insulated plus roof is a great choice. It's a custom timber roof made from high-quality, handcrafted materials that can transform your old conservatory into an elegant space you can enjoy all year round. If you prefer more natural light, our Ambi-Ultra glass roof is both energy efficient and blocks excess heat from the sun. We also offer hybrid roofs that combine glass and panels. No matter what you choose, our conservatory roof options will provide you with a beautiful room that you can use in every season.

Meticulously Designed & Tested.

Our range of conservatory replacement roofs are the result of years of research and development. By securing the latest energy performance, appearance and durability standards, we have designed the ultimate solution and ideal home improvement for your property. Whether its converting the room into a new office space, dining area or family room, we have the perfect solution for you.

Internally, our replacement roof roofs have a stunning finish. You have the option of a magnificent vaulted ceiling incorporating an internal pelmet where lights can be installed around the roof, making the room a natural extension of your home. You can insert or hang lights at the ridge at the top of the roof. If a vaulted ceiling is not what you are looking for, the glass and hybrid options offer an abundance of light and ventilation to your property, opening up the space but still making sure you can utilise the room all year round.

Roofline

We have a range of uPVC roofline products, including fascias, soffits and guttering, perfect for your home.

Fascias are an essential part of your home's roofline. They provide the bridge between your property's walls and roof. Being open to the weather, they provide a resistant and hard wearing performance against the elements.

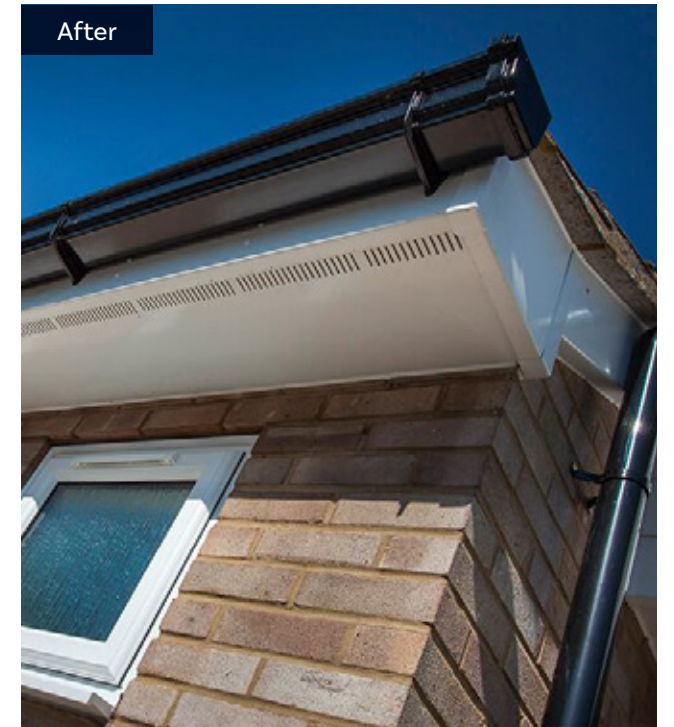

Soffits fit between the fascia and the wall of your home. They are an essential part of your property but won't require constant care with our low maintenance materials.

We have multiple types of uPVC soffits to suit any property, design, and style. Varying in weight, we can find a soffit that won't put a strain on your home's structure. Providing great ventilation, they reduce the build up of condensation and moisture, preventing damp and other damage.

Guttering protects your home from the worst the elements have to offer. Diverting excess water from your home prevents structural damage that can be caused if left to build up.

T&K are proud to be the only home improvements company to have qualified to join both HSBC and Santander's perks at work scheme.

Guaranteed for 10 Years

Due to being vertically integrated, when you partner with T&K, you are purchasing total piece of mind.

We look forward to helping you with your project and fulfilling your vision for the place you are proud to call home.

We are proud to manufacture both the frames and double-glazed units as well as directly employing all of our installers.

All of our home improvements are installed by our expert, employed, experienced installation teams and come complete with a fully comprehensive, 10 year insurance backed guarantee from the DGCOS. This provides you with total peace of mind.

Our award winning 10 year guarantee covers the following:

- All parts and materials
- Condensation or fogging between the two or three panes of glass
- The workmanship itself

The very best products in the industry are only as good as the people who install them.
